

 SPACECRAFT PRESS O5 I

50 copies launched

May, 2017

*Spacecraft Press* seeks compelling experimental poetry and prose inspired by science and technology. Whether this means that the text in question was generated using an automated procedure of some sort, operates under a science or technology inspired constraint, engages with scientific or technical language, emerged from a discourse happening within or between certain scientific fields, or some combination of these aspects.

All SPPR titles are available for download as .PDF files, free of charge: <https://spacecraftpress.wordpress.com/>
